SKILLS

- **Programming and data:** Python (pandas, PySpark), R, SQL, Spark SQL, and advanced Excel.
- **Visualization and BI:** Power BI (DAX, Power Query), Tableau, and Plotly.
- **Cloud and tools:** AWS (EC2), Apache Spark, Databricks, Git and GitHub, and Quarto.
- **Methods:** A/B testing, regression analysis, classification (KNN, decision trees, random forests), clustering, forecasting, data modeling, and statistical and quantitative analysis.
- **Finance:** Corporate finance, financial analysis, financial modeling, financial planning, and budgeting.

PROFESSIONAL EXPERIENCE

Royal Caribbean Group

Miami, FL

Senior Data Analyst

April 2026 – Current

- Analyze fleet deployment and itinerary scenarios, including port feasibility, fleet scheduling, and charter requests, using SQL, Python, and Excel to support itinerary planning decisions.
- Built Power BI dashboards, including a guest satisfaction dashboard connected live to Databricks through DirectQuery, with data models, DAX measures, and Power Query transformations.
- Developed a reusable Python script that consolidates ship-level planning files into a single weekly dataset, using fuzzy matching to reconcile port names against the itinerary system of record.
- Monitor speed and fuel compliance across the fleet and reconcile itinerary data across planning systems to keep schedules accurate.

Norwegian Cruise Line Holdings

Miami, FL

Data Analyst

May 2024 – April 2026

- Analyzed large, multi-source datasets using SQL, Excel, and Python to support revenue optimization, deployment strategy, and competitive analysis across global itineraries.
- Developed and maintained multiple interactive Tableau dashboards tracking bookings, capacity, load factor, and revenue, used weekly by 10–15 stakeholders across revenue and strategy teams.
- Performed trend, variance, and sensitivity analyses across thousands of sailings annually to evaluate changes in deployment, itinerary mix, and market conditions, supporting data-driven planning decisions.
- Automated multiple recurring reporting workflows using Excel (Power Query, advanced formulas) and Python, reducing manual reporting effort by 30–40% and improving turnaround time by 1–2 days per cycle.

Parkland Corporation

Miami, FL

Business Analyst

April 2022 – July 2024

- Developed multivariable pricing strategies to maximize return, resulting in a 3% gross margin increase YoY.
- Created dashboards and data visualizations for storytelling in Power BI and Excel, resulting in a 20% reduction in decision-making time.
- Generated data-rich reports, KPIs, and root cause analysis, leading to an 18% improvement in executive decision-making.
- Conducted cost analysis, identifying opportunities for \$30k in additional monthly gross income through allowances.
- Identified operating improvements from internal data, which reduced overtime by 11% month-over-month.

EDUCATION

Boston University

Miami, FL
